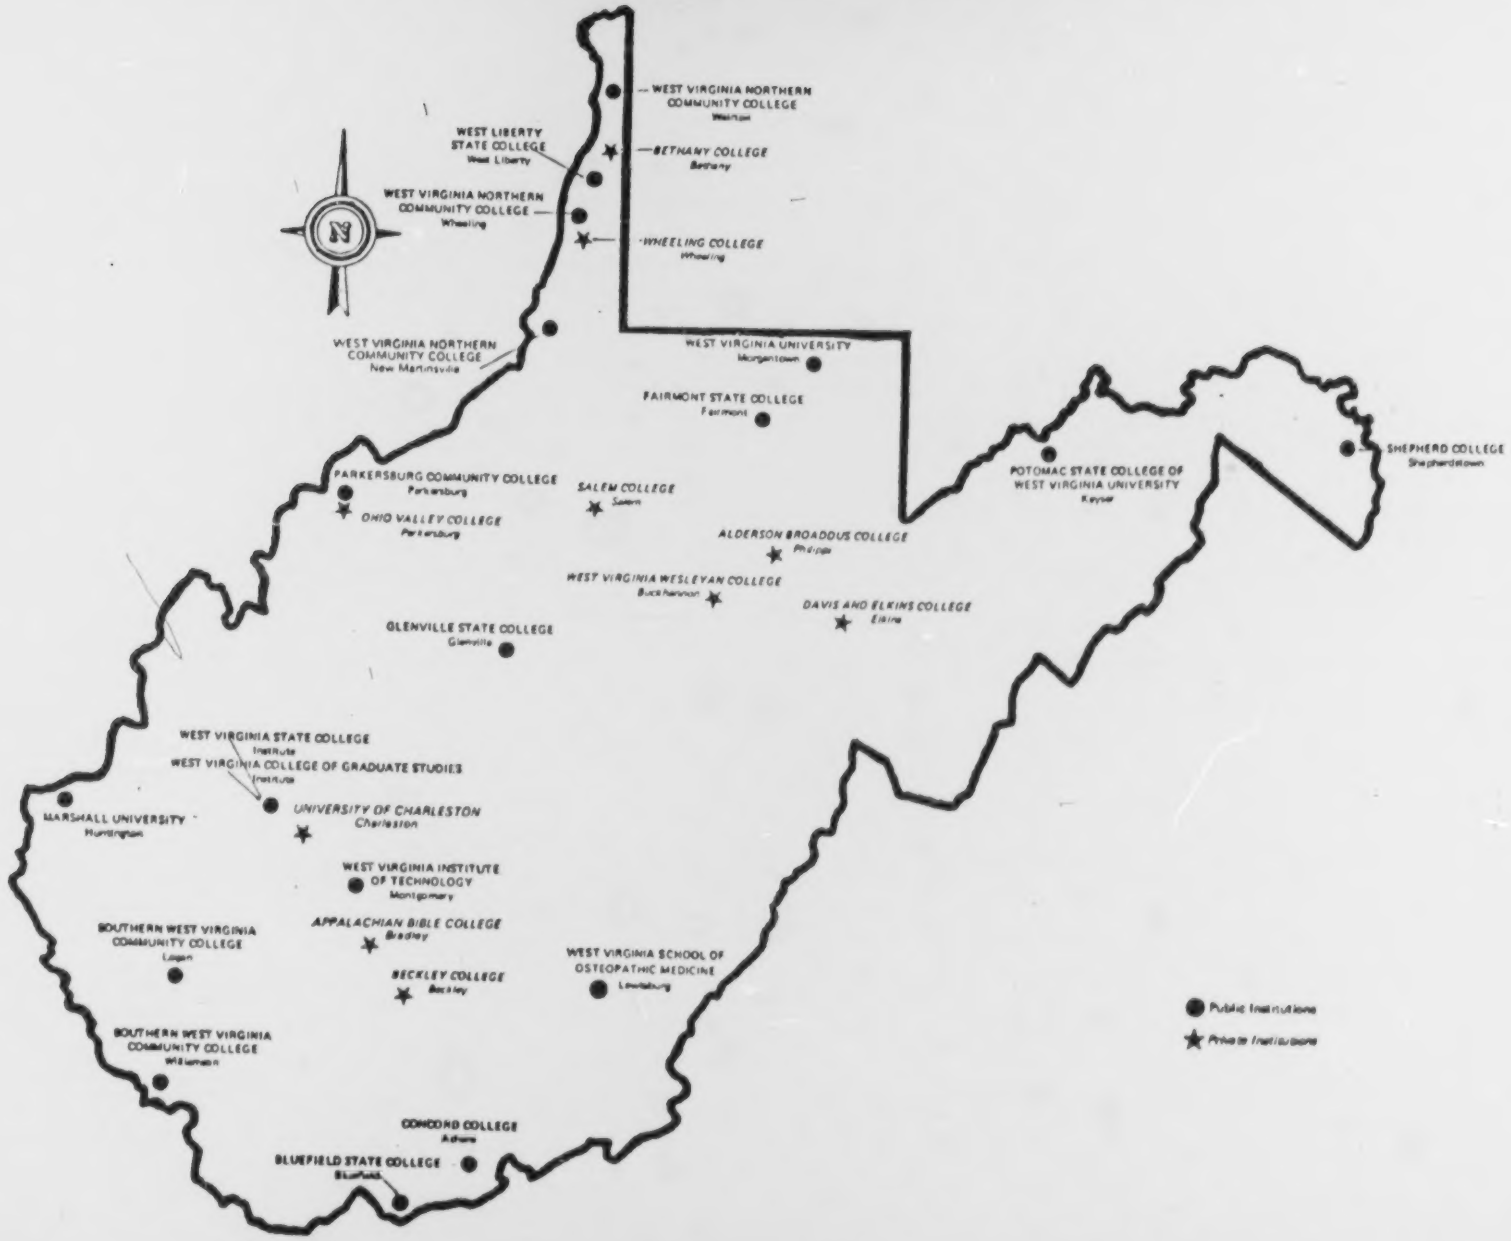
Locations of West Virginia Institutions of Higher Education



Introduction

For this publication's fifth year, a number of changes has been incorporated. Where possible, reports have been streamlined to enable the greatest amount of data in the space available. Chapter 1, "Enrollment," presents the headcount and full-time equivalent (FTE) enrollment reported by the State's public and private institutions of higher education for the Fall 1986 term. Reports for Spring and Summer Semesters have been added. Chapter 2, "Degrees Conferred," presents an analysis of degrees awarded by the State's public and private institutions of higher education during the 1985-86 academic year. This year teacher certifications and degree programs offered have been added. Chapter 3, "Faculty Characteristics," presents information about the full-time and part-time faculty members in West Virginia's public colleges and universities, as of the Fall 1985 term. (The characteristics analyzed in Chapter 3 include academic rank, highest earned degree, years of experience, age, sex, and average nine-month salary.) Chapter 4, "Fiscal Data," presents data on revenues and expenditures at the State's public colleges and universities during the 1985-86 fiscal year.

The 16 public and the 10 private institutions of higher education which reported data for inclusion in this publication are listed on page ii and a map showing their locations appears on page vii. The Board of Regents is grateful for the cooperation of the private institutions in submitting the data on enrollment and degrees conferred which are reported in Chapters 1 and 2.

Chapter I
Enrollment (Fall 1986)

The following student enrollment reports, which are based on data submitted by the State's public and private institutions of higher education, were current as of the days following registration for the Fall 1986 semester. Fifteen year trends in headcount and full-time equivalent enrollment are included.

Headcount enrollment is a count of the number of individual students enrolled in at least one course for credit in a college or university. The tables in this Chapter summarize credit headcount enrollment in all institutions of higher education in West Virginia. In addition, each institution's enrollment is reported by sex of student, attendance status, level, and residence.

The full-time equivalent (FTE) enrollment reported for each public institution of higher education is the nationally accepted statistic used to equate to the norm those student workloads which are greater or less than the average full-time student workload. For the first time pre-distribution for spring and summer are included.

The FTE enrollment, which is the principal measure of total services to students by the West Virginia public institutions, peaked at 55,307 in Fall 1981, declined to steadily to 51,005 then rose slightly in 1986. There were two five-year periods of growth followed by leveling, beginning in 1973 and 1978, respectively.

It should be noted that the decreases in headcount enrollment occurring in 1978, 1984 and 1985 are reflected in more modest drops in full-time equivalent enrollment, principally because the decrease was largely in the number of part-time students.

Although a five percent drop in enrollment occurred from 1983 to 1984 and again in 1984 to 1985, these can be attributed largely to increases in tuition costs without increases in available financial aid.

Definitions of the various enrollment categories used by the Board of Regents are presented on the following pages.

Definitions

Bachelor's Credit Student. An undergraduate enrolled in a two-year college transfer program or in a four-year or five-year bachelor's degree program who has not completed the sophomore year.

Career-Technical Student. A lower-level undergraduate enrolled in a postsecondary certificate, diploma, or associate degree program of less than four years which prepares for immediate employment.

First-Professional Course. A course designed primarily for students enrolled in a program leading to a first professional degree.

First-Professional Student. A student enrolled in a program leading to the first professional degree in Dentistry (D.D.S.), Law (J.D. or LL.B.), or Medicine (D.O. or M.D.).

First-Year Graduate Student. A graduate student who is enrolled in a master's degree program or who has completed fewer than 36 semester hours of graduate credit.

Foundation Level Course. A course which is preparatory for admission to a career-technical, college transfer, or four-year or five-year bachelor's degree program.

Full-Time Student. A student enrolled for credit equal to at least 75 percent of the normal full-time load. For most undergraduates this is 12 semester hours; for graduate students, nine semester hours.

Full-Time Equivalent (FTE) Student. A statistic derived from the student-credit-hour productivity of an institution.

A. Undergraduate FTE: the equivalent number of students derived by dividing by 15 the total undergraduate student credit-hours produced per semester in foundation, lower-level, and upper-level courses.

B. First Professional FTE: the equivalent number of students derived by dividing by 15 the total first professional student credit-hours produced per semester in first professional courses (Law only).

C. Graduate FTE: the equivalent number of students derived by dividing by 12 the total graduate student credit-hours produced per semester in graduate courses.

D. Medical FTE: the same as the headcount enrollment (Dentistry and Medicine only).

Graduate Level Course. A course designed for students enrolled in a graduate degree program and normally limited to students holding a bachelor's degree.

Graduate Level Student. A student enrolled in a master's or doctoral degree program other than the first professional degree programs in Dentistry, Law, and Medicine.

Headcount. A student enrolled in one or more courses for credit.

In-State Student. For West Virginia public institutions, a student is assessed the tuition and fees specified for a resident of West Virginia; for West Virginia private institutions, a student who lists West Virginia as the permanent address prior to enrolling in the institution.

Lower-Level Student. An undergraduate enrolled in a postsecondary career-technical, certificate, diploma, or associate degree program, in a two-year college transfer program, or in a four-year or five-year bachelor's degree program who has not completed the sophomore year.

Non-Credit Student. A student who is enrolled only in non-credit courses or who is auditing credit courses.

Out-of-State Student. For West Virginia public institutions, a student who is assessed the tuition and fees specified for a non-resident of West Virginia; for West Virginia private institutions, a student who does not list West Virginia as the permanent address prior to enrollment in the institution.

Part-Time Student. A student enrolled for credits equal to fewer than 75 percent of the normal full-time load. For most undergraduates this would mean fewer than 12 semester hours.

Unclassified Student. A student who cannot be classified by level. Many unclassified students are permitted to take a limited or special selection of degree-credit courses without regard to requirements for a degree.

Undergraduate Student. A student who has not yet obtained a bachelor's degree.

Upper-Level Course. A course designed for juniors and seniors which is not normally open to freshmen and sophomores.

Upper-Level Student. An undergraduate enrolled in a bachelor's degree program who has completed the sophomore year.

The number of full-time students has remained fairly constant throughout the system for more than ten years. The low of 39,584 increased to peak at 44,355 in 1983, then fell off 2,800 to 41,528 in 1985,and then and increase of 631 this Fall. In contrast, part-time students increased an average of 1,251 per year from 1971 to peak at 29,582 in 1979 then decreased an average of 666 students per year to 24,920 in 1986. The number of male students has held rather constant while the female population has grown substantially. Females increased as a proportion of the total population at a steady pace from 43.3 percent in 1974 to 55.5 percent in 1986.

The number of non-resident students increased steadily to peak at 14,879 (20.0 percent of total enrollment) in 1981. The following years' substantial increases in non-resident tuition may have been the cause of a steady decline in number and percentage of out-of-state students.

#Although not a separate entity, it is often important to distinguish the WVU Medical Center for budgetary considerations. It is here defined for FTE purposes as student credit hours generated in courses identified as Heath Science Center by the institution.

Headcounts are used for medical and dental students. WVU has 324 medical students and 157 dental students.

Chapter 2
Degrees Conferred (1985-86)

The tables in this Chapter present an analysis of the degrees conferred during the 1985-86 academic year by the public and private institutions of higher education in West Virginia, as well as ten-year trends in total degrees conferred.

DEFINITIONS

Nationally accepted definitions and principles have been used in the collection and classification of data for this Chapter. The 29 academic areas of study included in the report (excluding the West Virginia Board of Regents' B.A. degree program) have been extracted from the publication by the National Center for Educational Statistics, A Classification of Instructional Programs. Definitions of the various degrees are as follows:

Associate Degree. A degree awarded upon completion of at least two, but fewer than four, years of work beyond high school.

A. Career-Technical -Associate degree programs in technological and occupational areas that are designed primarily to prepare for immediate employment.

B. Pre-Baccalaureate -Associate degree programs that are designed to provide a two-year general education and/or to be chiefly or wholly creditable toward a bachelor's degree.

Bachelor's Degree. A degree granted upon completion of an educational program requiring at least four, but not more than five, years of academic work in the liberal arts, sciences, or professional fields.

First Professional Degree. A degree which signifies the completion of the academic requirements for a selected profession, which is based on an educational program requiring at least two academic years of previous college work for entrance, and a total of at least six academic years of college work for completion. First professional degrees included in this report are the Doctor of Dental Surgery (D.D.S.), the Doctor of Medicine (M.D.), the Doctor of Osteopathy (D.O.), and the Juris Doctor (J.D.).

Master's Degree. A degree customarily granted upon successful completion of one (sometimes two) academic years of work in the liberal arts and sciences beyond the bachelor's degree. The master's degree in professional fields is an advanced degree beyond the first professional, but below the Ph.D. degree.

Doctoral Degree. The highest academic degree in a given discipline or profession, based generally on three or more years of graduate work, satisfaction of a foreign language requirement, and completion of a special study resulting in a dissertation approved by a committee of the faculty.

Programs and Degrees Offered

MARSHALL UNIVERSITY

CERTIFICATE PROGRAMS
- Real Estate
- Industrial Supervision and Management
- Occupational Safety and Health
- Computer Technology
- Emergency Medical Technology
- Fire Science Technology

ASSOCIATE'S DEGREES
- Business Management Technology
- Banking & Finance
- Real Estate
- Small Business Management
- Industrial Supervision & Management
- Accounting
- Office Technology
- Legal Secretarial Studies
- Medical Secretarial Studies
- Clerical Studies
- Retailing

ASSOCIATE DEGREES cont'd
- Computer Technology
- Electronics Technology
- Occupational Safety and Health
- Cytotechnology
- Medical Laboratory Technology
- Nursing
- Legal Assistant
- Library Media Technology
- Police Science
- Fire Science Technology

BACHELOR'S DEGREES
- Accounting
- Finance
- Management
- Economics
- Marketing
- Business Informations Systems
- Journalism

BACHELOR'S DEGREES cont'd
- Computer Science
- Education, Elementary
- Education, Secondary
- Distributive Education

- Master of Business Admin.

WHEELING COLLEGE

BACHELOR'S DEGREES
- Accounting
- Banking and Finance
- Business Administration
- Indust. & Labor Relations
- Marketing
- Management
- Allied Health Admin.

BACHELOR'S DEGREES cont'd
- Math, Computer Science
- Indust. Engineering
- French
- Spanish
- Clinical Sci/Nuclear Med.
- Clinical Sci/Respir. Therapy
- Clinical Sci/Medical Tech.

BACHELOR'S DEGREES cont'd
- Nursing
- English
- Professional Writing
- Bachelor of Lib. Arts
- Independent Major
- Biology
- General Science

BACHELOR'S DEGREES cont'd
- Mathematics
- Mathematics - Applied Math
- Philosophy
- Theology
- General Science (Phyics)
- Chemistry

BACHELOR'S DEGREES cont'd
- Physics
- Psychology
- Criminal Justice
- History
- International Studies
- Political Science
- International Relations

MASTER'S DEGREES
- Business Administration
- Science and Mathematics
- Religious Education

TOTAL	10,502	10,351	10,506	10,329	10,517	10,322	10,422	10,706	10,500	10,758	10,875	11,103	10,871
TOTAL DEGREES	10,502	10,351	10,506	10,329	10,517	10,322	10,422	10,706	10,500	10,758	10,875	11,103	10,871

The number of total degrees awarded per year has held remarkably constant over the ten-year period. However, the percentage of females awarded the total number of degrees increased steadily over the period, from 43.7% in 1973-74 to 51.94% in 1981-82, then appeared to level off.

Other discernable patterns include: 1. A steady increase in the number of First Professional degrees, due to the addition of two medical schools in that time period, 2. A steady increase averaging 6.5% per year in the number of associate degrees, reflecting increased enrollment in community college and career-technical programs, and 3. The number of master's degrees rose steadily from 1,777 to peak around 2,650 per year from 1977-80, then started to decline.

Chapter 3
Faculty Characteristics (Fall 1986)

The West Virginia Board of Regents presents in this Chapter analyses of faculty characteristics and renumeration at each West Virginia public institution of higher education. All analyses are based on the Fall term of the 1985-86 academic year.

Faculty members included in this report are those individuals engaged in instruction, either on a full-time or part-time basis, who were responsible for, or in charge of, a class, quiz, drill, or laboratory section. Teaching assistants, teaching fellows, lecturers, and laboratory assistants are included only if they meet the preceding criteria. Excluded are student assistants, teaching assistants, and other personnel engaged in subordinate functions.

Faculty of the following classifications have been excluded from this Chapter: faculty in the medical schools, faculty contributing their services, and faculty compensated from funds not controlled or disbursed by their respective institutions. Included in this last group are military science instructors, instructors receiving no pay, and faculty paid through the auspices of other public agencies at no expense to the institution.

DEFINITIONS

Full-Time Faculty Members. A faculty member employed by the institution in a full-time capacity, either teaching or teaching plus additional administrative duties. In the latter case, the full-time faculty member is engaged in teaching at least one course.

Full-Time Faculty Member Engaged Exclusively in Instruction. A faculty member employed by the institution in a full-time capacity, whose duties lie exclusively in teaching rather than partially in administration, or some other function.

Part-Time Faculty Member. A faculty member employed to teach in a part-time capacity, usually employed on a per-course basis. Generally, part-time faculty do not receive fringe benefits, and since remuneration is based solely on teaching load rather than on advising and administrative duties their pay is at a substantially lower rate than that of full-time faculty.

Highest Degree Held by Faculty. The fraction of faculty possessing a terminal degree (doctoral or professional) is one indicator of academic quality of an institution. The proportion of faculty with a doctorate also influences the expenditures for faculty salaries.

Nine-Month Salary. A typical academic year contract, which may be for nine or ten months of duties to the institution. Whether the contract salary is paid in nine or twelve monthly increments is not relevant. The amounts shown under nine-month salary data do not include summer school salaries, which are not a part of the regular academic year.

Under each rank is shown the number (#) of faculty members, average salary on a nine month basis, average experience (EXP) with the institution of present employment (INST) experience with all institutions (TOT), and the average age.

*Total may include faculty with other ranks such as lecturer, research professor, visiting associate professor, etc.

Chapter 4

INTRODUCTION

Since its inception in 1969 the Board of Regents has played an active role in the management of all facets of public higher education. Among its many responsibilities is the supervision and control of the financial affairs of its sixteen institutions. This chapter of current operating revenue and expenditures summarizes the financial condition and current operations of the State System of Higher Education. Information presented in this report is drawn from financial reports completed by each institution shortly after the close of the fiscal year. The period covered by this report extends from July 1, 1985 through June 30, 1986.

By design, this chapter deals with a discussion of current operating and capital revenue and expenditures. Therefore, certain special fund groups such as Loan Funds (student loans), Agency Funds (institution acting as financial agent for payor) and the like have been omitted. Current funds are categorized as follows: Educational and General, Auxiliary Enterprise, Student Aid, Capital Improvements and Medical Schools and Medical Center, and will be further defined and classified in the text of this report.

Wherever possible, tables in this chapter attempt to group similar institutions. In West Virginia, the eight four-year colleges and three community colleges constitute similar groups, while the two universities, the College of Graduate Studies, and the branch college are essentially dissimilar. In addition, the Marshall University School of Medicine, West Virginia School of Osteopathic Medicine, and the West Virginia University Medical Center are inherently different, and although presented together the data should not be used for comparative purposes.

Although certain comparisons among institutions are possible, and often beneficial, the reader should recognize that any interpretations drawn may be distorted due to differences in enrollment, academic programs, funding levels, geographic locations, faculty characteristics, and other factors. Institutions may also vary with respect to the degree to which they attempt to feed, house, and provide services of a non-educational nature to students, faculty, and staff.

Total Operating Revenue and Expenditures

Tables 4.1 and 4.2 reflect the total operating revenue and expenditures of the State System of Higher Education for fiscal year 1985-86. They are presented and categorized as follows:

Educational and General operations of the institutions include the basic Instruction, Research, and Public Service activities as well as the necessary ancillary services of Academic Support, Student Services, Institutional Support and Physical Plant Operations.

Auxiliary Enterprise operations primarily involve providing services of a non-educational nature to students, faculty and staff. Even though the existence of these services is important, they are not directly related to the fulfillment of the institutions' educational objectives. Included among these operations are housing and dining, intercollegiate athletics, student unions, bookstores and certain parking and transportation systems.

Medical Schools and Medical Center relate to the operation of the state's two medical schools, its medical center, and necessary support services.

Student Aid relates to gifts, grants, endowments, or other sources of income which are specifically designated for student scholarships, grants, awards, and the like.

Capital Improvements includes funding from student fees dedicated by West Virginia statute to service outstanding debt or fund capital improvements, as well as the proceeds of bond sales, interest income, and other revenues specifically earmarked for land acquisition, building construction and renovation, and capital equipment purchases.

Educational and General Revenue

Educational and General operating revenue is typically classified according to source. This report classifies educational and general revenue according to six major sources. A brief description of each source follows:

Student Fees. Revenue available for use by an institution from fees assessed students for educational and general purposes is included in this category. Included are those prescribed fees that must be paid by the student as a condition for applying for admission, enrolling in the institution, enrolling in specific courses, and graduation from the institution. Also included are those student fees allocated by the Board of Regents to supplement institutional operating budgets. Excluded from this report are all other fees restricted by West Virginia statute from use as operating revenue.

Governmental Appropriations. Includes allocations to the colleges and universities by the Board of Regents from the State Legislature's annual operating appropriation. These allocations are restricted by the State budget categories of Personal Services, Current Expenses, Repairs and Alterations, Equipment, and certain other items. Amounts that were unspent and reverted to the State Treasury at the end of the fiscal year are deducted from the original allocations. Also included are federal appropriations received by the State's Land Grant institution, West Virginia University.

Governmental Grants and Contracts. Include revenue received from local, state, or federal government agencies to conduct specific activities or programs, or to provide designated services.

Private Gifts, Grants, and Contracts. Revenue received from private individuals, businesses, industries, foundations, and the like which is available for expenditure for educational and general purposes is included in this category.

Sales and Services. Includes revenue received by the institution from the sale of goods or services produced in conjunction with its educational program, such as agricultural and dairy products, films, publications, and the like.

Other Income. Revenue available for educational and general purposes which is not classified elsewhere, such as interest income, is included here.

Tables 4.5-4.9 on the following pages provide information and comparisons with respect to educational and general revenue.

Method of Analysis

There are two commonly utilized methods of analyzing educational and general revenue and expenditures. One compares the percentage relationship of each revenue source or expenditure function to total revenue or expenditures. This technique reflects the comparative degree of support provided by a specific revenue source. For expenditures, it indicates the level of support for one function compared to that given another function, and also reflects the emphasis a particular institution places on various expenditure categories.

A second approach is to consider revenue and expenditures on a per full-time equivalent (FTE) student basis. The FTE student is the nationally accepted means to translate student credit hours produced by an institution into a more manageable statistic. This statistic is most useful in comparing similar type institutions. It should be recognized that some educational and general activities, such as Research, Public Service, and Physical Plant Operations are not directly related to enrollment.

Tables 4.5 through Table 4.13 include percent of total and per FTE comparisons for educational and general revenue and expenditures respectively. For purposes of per FTE comparisons, these tables use an annualized count of full-time equivalent students, which is comprised of the total of Fall, Spring and Summer FTE enrollments divided by two. The calculation basis for annualized FTE enrollment has been changed for the 1985-86 year to more accurately reflect average yearly enrollment. Prior year comparative figures in this publication have been adjusted accordingly to reflect this new basis and provide accurate comparisons. Prior year amounts reported herein will not match those contained in previous Board of Regents publications.

*State General Fund Revenue comprises the major source of Governmental Appropriations.

Educational and General Expenditures

Expenditures for educational and general purposes include those expenditures for Instruction, Research and Public Service, as well as the necessary ancillary activities of Academic Support, Student Services, Institutional Support and Physical Plant Operations and are defined as follows:

Instruction. Includes all expenditures of the instructional departments and schools of the institutions, such as instructional salaries and benefits, office and classroom supplies, equipment, and other related operating costs. This category also includes departmental research which is not separately budgeted or organized.

Research. Includes all expenditures for separately organized and budgeted research activities, such as research bureaus, centers, institutes, and experiment stations. This category includes both externally financed contractual research and institutionally organized and financed research.

Public Service. Includes all expenditures for noninstructional activities designed primarily to serve the general public, including the costs of all conferences, workshops, public radio and television operations, cooperative extension services, and similar activities.

Academic Support. Includes expenditures designed to assist the institution in meeting its basic instruction, research, and public service mission by providing support services such as libraries, media and learning centers, academic computer support, as well as general academic administration, and faculty and curriculum development activities.

Student Services. Includes all expenditures for services to student, such as admissions and registrar's offices, guidance and counseling services, placement services, health services, financial aid administration, student administration, and the like.

Institutional Support. Includes all expenditures of the general executive and administrative offices serving the institution as a whole as well as those expenditures of a general character not relating to any specific division or segment of the institution.

Physical Plant Operation and Maintenance. Includes all expenditures for the operation and maintenance of educational and general buildings and grounds such as utilities, and custodial services.

Other Revenue and Expenditures

Auxiliary Enterprise. Revenue and expenditures of the various colleges and universities from operations of a noneducational nature are categorized as Auxiliary Enterprises and summarized in Tables 4.14 and 4.15 on the following pages. The six major catagories of Auxiliary Enterprises include Housing and Dining, Student Union, Bookstore, Intercollegiate Athletics, Parking and Transportation, and Other.

The degree to which an individual institution provides Auxiliary Enterprise services to its students is dependent to a large extent on its size and type. An institution with a large resident population must necessarily provide more comprehensive services than one in which the majority of students are commuters.

Medical Schools and Medical Center. The West Virginia Board of Regents operates two medical schools and a comprehensive medical center as part of the State System of Higher Education, including the Marshall University School of Medicine, the West Virginia School of Osteopathic Medicine, and the West Virginia University Medical Center. Although financial information for the three schools is presented together, no attempt should be made to compare them due to the differences in their educational programs and supporting functions.

Student Aid. Revenue from gift, grants, endowments, and the like provided for the purpose of assisting individual students in defraying the costs of higher education is categorized as Student Aid. This aid may be in the form of need-based grants, awards for academic excellence, or combinations of these and other factors. Excluded from Student Aid presented in this chapter are privately administered scholarships and grant programs, such as those normally awarded by private foundations, trusts and institutions, and student loans. Student Aid revenue and expenditures for Fiscal Year 1985-1986 are presented in Tables 4.1 and 4.2.

Capital Improvements. Funding for Capital Improvements at West Virginia's public colleges and universities, as identified in Table 4.1 and Table 4.2 is derived primarily from dedicated student Tuition and Registration fee collections, as well as proceeds from bonds sold for this purpose and redeemed with these fee collections. In addition, interest income, insurance proceeds and, to a limited extent, federal grants also provide revenue for Capital Improvements. Unlike most states, West Virginia uses almost no state tax rvenues for this purpose. Capital Improvement revenue is generally collected in a central account under the Board of Regents, and allocated to each institution for expenditure. Certain systemwide improvements, and all debt retirement expenditures are reported under the Board of Regents.
